

# DAGSBORO AMERICAN LEGION

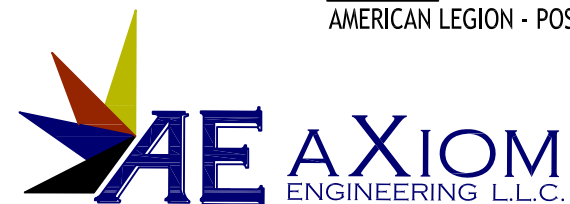

## AXIOM ENGINEERING 2006-2008 PROJECT

Axiom Engineering was retained to provide site design for the development of the new American Legion Post 24 facility. Development was phased to allow for the continuous use of the existing facility until the new facility was completed.

Site Engineering from initial concept to final approval of site construction documents including on-site wastewater disposal, State Fire Marshal, DELDOT Entrance Permit, grading, stormwater management, sediment and erosion control.
